

EXPERIENCE

Full Stack Developer

Jan, 2023 - Present | Surat, Gujarat

- Crafted user-friendly interfaces that adapt seamlessly to different devices using popular frameworks like Bootstrap and Tailwind CSS by implementing responsive design principles.
- Implemented optimization strategies, including memoization, caching, lazy loading, and minimizing HTTP requests, in order to enhance performance and efficiency of web applications.

Development Intern

Codexive Solutions

Nov, 2024 - Present | Surat, Gujarat

- Rigorously immersed myself in full-stack web development, mastering both frontend and backend technologies through hands-on projects, guided tutorials, and real-world application building.
On the frontend, gained solid experience in React.js by working on dynamic UI components, implementing virtual DOM manipulation, and applying component-based architecture. Built responsive and interactive web interfaces by applying HTML5, CSS3, Tailwind CSS, and modern JavaScript (ES6+).
- On the backend, developed scalable server-side applications using Node.js and Express.js, focusing on building RESTful APIs, managing routing and middleware, and implementing robust authentication systems using JWT and OAuth. Strengthened understanding of asynchronous programming using Promises and async/await. Integrated MongoDB and PostgreSQL databases for dynamic data handling in full-stack applications.
Demonstrated practical skills by cloning popular web platforms and deploying complete applications, effectively bridging frontend and backend logic into seamless user experiences.

Projects

• StudyFinds

1. Scalable Data Modeling : Designed MongoDB schemas for a social media app, including Users, Posts, Collections, Followers, and Notifications, ensuring efficient data relationships and scalability.
2. Secure Authentication : Implemented secure password hashing with salt generation and token-based password reset functionality to enhance user authentication and security.
3. Social Features Integration : Enabled follow/unfollow, nested comments, likes, and real-time notifications for actions like new posts and follows, ensuring an interactive user experience.

• YouTube Clone

1. Full-stack YouTube clone with React/TypeScript frontend and Node.js/Express backend.
2. Uses PostgreSQL with Sequelize ORM for database management.
3. Users can register, log in, create channels, and upload HLS videos (Cloudinary storage).
4. Features include comments, likes, playlists, subscriptions, and channel analytics.
5. JWT authentication, password reset via email, and secure user management.
6. Real-time upload progress and notifications via Socket.IO.
7. Modern, responsive UI with pages for profile, channel, and video management.
8. Each user sees only their own channel's videos on profile/channel pages.
9. Modular, scalable, and type-safe codebase following best practices.

SKILLS

Front-End

- HTML
- CSS
- JavaScript
- React Js
- TypeScript
- Bootstrap
- Tailwind
- API
- Redux
- Material ui
- shaden ui

Back-End

- Node Js
- EXpress Js
- Soker.io

Databases

- Mongo DB
- PostgreSQL
- MySql

Tools

- Git
- Github
- VSCode
- Sublime
- Postman
- Prettier
- ESLint

SOFT SKILLS

- Communication
- Documentation Writing
- Topics Explanation
- Technical Mentorship
- Collaboration
- Continuous Learning

EDUCATION

Bachelor of Computer Appkation

Bhakta Kavi Narsinh Mehta University

junagadh
