

EXPERIENCE

MERN Stack Developer

- Developing and maintaining full-stack applications using MERN stack technologies (MongoDB, Express.js, React, Node.js)
- Building scalable RESTful APIs using Node.js and Express.js for backend services
- Implementing responsive and interactive user interfaces using React with Redux for state management
- Working with multiple databases including MongoDB, PostgreSQL, and MySQL for efficient data management
- Collaborating with cross-functional teams to deliver high-quality software solutions
- Optimizing application performance through code refactoring and implementing best practices

Developement Intern

Karmadhi Solutions

Aug, 2024 - Present | Surat, Gujarat

- Rigorously immersed myself in full-stack web development, mastering both frontend and backend technologies through hands-on projects, guided tutorials, and real-world application building.
On the frontend, gained solid experience in React.js by working on dynamic UI components, implementing virtual DOM manipulation, and applying component-based architecture. Built responsive and interactive web interfaces by applying HTML5, CSS3, Tailwind CSS, and modern JavaScript (ES6+).
- On the backend, developed scalable server-side applications using Node.js and Express.js, focusing on building RESTful APIs, managing routing and middleware, and implementing robust authentication systems using JWT and OAuth. Strengthened understanding of asynchronous programming using Promises and async/await. Integrated MongoDB and PostgreSQL databases for dynamic data handling in full-stack applications.
Demonstrated practical skills by cloning popular web platforms and deploying complete applications, effectively bridging frontend and backend logic into seamless user experiences.

Projects

• StudyFinds

1. Scalable Data Modeling : Designed MongoDB schemas for a social media app, including Users, Posts, Collections, Followers, and Notifications, ensuring efficient data relationships and scalability.
2. Secure Authentication : Implemented secure password hashing with salt generation and token-based password reset functionality to enhance user authentication and security.
3. Social Features Integration : Enabled follow/unfollow, nested comments, likes, and real-time notifications for actions like new posts and follows, ensuring an interactive user experience.

• YouTube Clone

1. Developed full-stack YouTube clone with React/TypeScript frontend and Node.js/Express backend
2. Implemented PostgreSQL database with Sequelize ORM for efficient data management
3. Built user authentication system with JWT tokens and password reset via email
4. Created video upload functionality with HLS video support using Cloudinary storage
5. Implemented real-time features including comments, likes, playlists, subscriptions, and channel analytics
6. Integrated Socket.IO for real-time upload progress and notifications
7. Built modern, responsive UI with dedicated pages for profile, channel, and video management
8. Ensured user-specific content visibility and secure user management
9. Followed modular, scalable, and type-safe codebase architecture

SKILLS

Front-End

- HTML
- CSS
- JavaScript
- React Js
- TypeScript
- Bootstrap
- Tailwind
- API
- Redux
- Material ui
- shadcn ui

Back-End

- Node Js
- EXpress Js
- RESTful APIs

Databases

- Mongo DB
- PostgreSQL
- MySql

Tools

- Git
- Github
- VSCode
- Sublime
- Postman
- Prettier
- ESLint

SOFT SKILLS

- Communication
- Documentation Writing
- Topics Explanation
- Technical Mentorship
- Collaboration
- Continuous Learning

EDUCATION

Bachelor of Computer Applaction

Bhakta Kavi Narsinh Mehta University

junagadh
